

You make the
discovery. We help
make it reality.

Transforming your CDMO experience.

Discover the **Avid** effect.™ ►

From concept to market, we're your advocate.

Leveraging more than 30 years of experience manufacturing biologics, Avid Bioservices delivers high-quality biotherapeutics to support our clients' goals of improving patients' lives.

From early-stage to late-stage, concept to market, every part of our process is personalized.

**We're your advocates, your trusted experts,
your true partners.**

Your life's work is in good hands.

Our community is made up of brilliant thinkers, good listeners, and problem solvers. We're the people you want on your team at every stage. **That's the Avid effect.**

Unrivalled Expertise

With skilled process development and manufacturing groups and experienced executives leading the way, we offer expertise unmatched by any CDMO our size.

World-Class Facilities

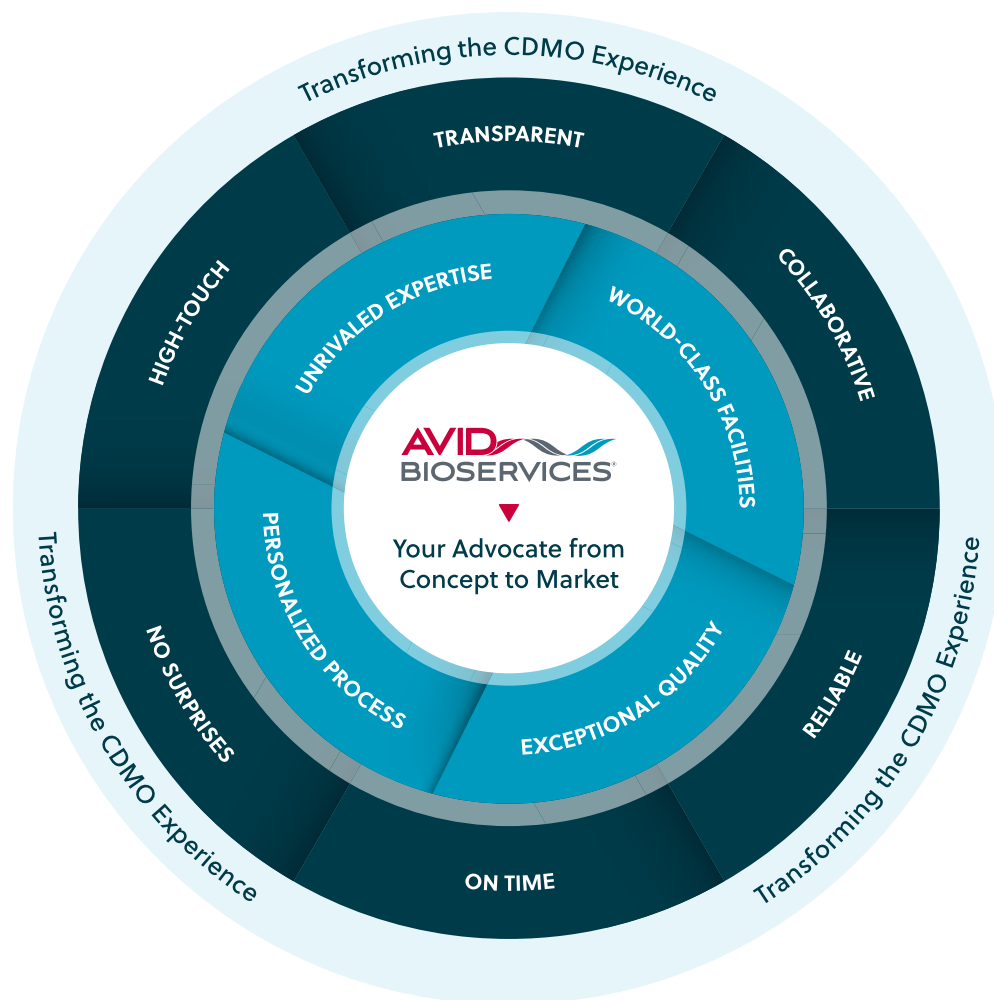

Our state-of-the-art facilities feature advanced single-use bioreactors and flexible CGMP suites optimized for efficient, scalable production of biologics. With ample capacity available, we offer our clients immediate scheduling.

Exceptional Quality

We're committed to ensuring the highest level of compliance and process excellence for our clients, ready to tackle any challenges with proactive communication and transparency.

Personalized Process

We approach every customer and molecule with personalized care, offering a flexible process tailored to your unique needs.

Recognized as a trusted CDMO for clinical and commercial biologics.

We've transformed the CDMO experience, with 30+ years manufacturing biologics, world-class facilities, a flawless track record for quality, and a personalized process.

Mammalian Protein Capabilities

Process Development

Our process development team has over three decades of experience with development, tech transfer, optimization, and scale-up of processes for CGMP manufacturing.

CGMP Manufacturing

We also offer comprehensive CGMP manufacturing services, ensuring high-quality, scalable production to meet the stringent regulatory requirements of biologic therapies.

Analytical Services

Our analytical team offers extensive experience in transferring, developing, qualifying, and validating client assays.

Quality Systems

We're committed to providing high-quality drug substances, uncompromising compliance, and value-added services to our clients.

Tech Transfer & Scale-Up

Our seamless technology transfer and scale-up services ensure an efficient transition from development to CGMP manufacturing. Our pilot-scale single-use bioreactors (50–200L) and deep expertise accelerate the path to market for complex molecules.

State-of-the-art facilities powering your program's success.

Our world-class facilities in southern California are designed to support mammalian protein manufacturing needs, featuring advanced single-use bioreactors and flexible CGMP suites tailored for efficient and scalable production of biologics.

We provide our clients flexibility by offering endless options and work with you to align timelines.

I could not have found
a better partner than
Avid Bioservices.
They far exceeded
my expectations.

I have found Avid
Bioservices to be flexible,
pragmatic, collaborative,
and trustworthy. I highly
recommend them.

We are so thankful that
we chose Avid.

Thank you for being an excellent
steward and an advocate.

Ready to transform your CDMO experience?

Find out how Avid Bioservices can help you
bring your vision to life.
