

BIOLOGICS DEVELOPMENT AND MANUFACTURING

**One partner.
Every molecule of the way.**

A US-based biologics CDMO built to operate as an extension of your team. 30+ years of mammalian manufacturing for emerging biotech, clinical-stage companies, and biopharma scaling to commercial.

OVERVIEW

Built around the molecule. Built around the team behind it.

Your molecule deserves a partner who treats it like their own, that conviction is where Avid starts. We're a dedicated biologics CDMO, focused entirely on mammalian cell culture, with two California facilities that carry a program from early-phase development through commercial manufacturing. And what sets the experience apart isn't only the science; it's a team that's genuinely invested in getting your molecule to the patients who need it.

AVID BY THE NUMBERS

A proven partner with deep experience supporting biologics.

650+

More than 600
total batches
produced

275+

More than 275
commercial batch-
es produced

90+

Approved
manufacturer of
products
marketed in
more than 90
countries

30+

Years of
experience
manufacturing
biologics

23

Years of
successful
inspection
history

20

Years of CGMP
commercial
manufacturing
experience

17

Years of single use
technology,
multiple platforms

10

Successful
pre-approval /
pre-license
inspections

7

Commercial
products

**ZERO
483S**

Zero 483 FDA
observations over
the last 10+
years

One facility. One team. One partner across the full biologics lifecycle.
From the first molecule to the millionth dose with you, every molecule of the way.

CAPABILITIES

Mammalian biologics. The full lifecycle. Molecule to market.

- Monoclonal antibodies (mAbs)
- Multispecific antibodies
- Fusion proteins
- Recombinant proteins
- And other diverse modalities
- Cell line development
- Process development
- Analytical development
- Formulation development
- CGMP manufacturing
- Pre-IND through commercial
- 2,000L single-use bioreactors
- Parallel processing capabilities
- Tech transfer
- Quality track record

WHY AVID BIOSERVICES

The advantages of working with a dedicated biologics CDMO.

30+ years of biologics expertise

A dedicated biologics CDMO focused on mammalian cell culture.

End-to-end continuity

Cell line through commercial supply. One team, two California facilities.

US-based operations

Tustin and Costa Mesa, California facilities. BIOSECURE Act-aligned.

Regulatory track record

Decades of successful FDA inspections. Commercial-approved processes. CGMP throughout.

Partnership model

Direct access to Avid scientists. Person-in-plant programs. An extension of your team.

Let's build what's next, together.

Whether you're moving your first molecule into the clinic or scaling a Phase 3 program toward commercial launch, Avid is built to be there for the full journey. One partner. Every molecule of the way.
