

EARLY PHASE CENTER OF EXCELLENCE

A purpose-built, early-phase center where cell line development, process development, analytical work, and clinical manufacturing move as one — so your molecule reaches the clinic faster.

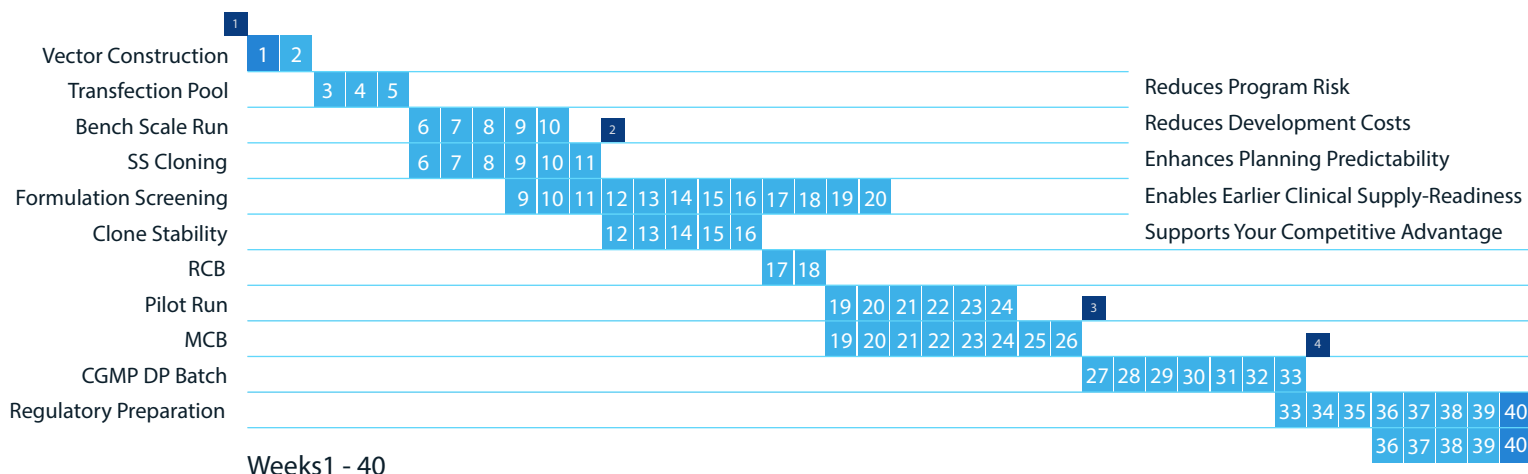

SPEED AND EXECUTION

Built for speed. Designed to scale.

Speed and rigor, together. At Avid's Costa Mesa Center of Excellence, the teams that develop your cell line, build your process, and create your analytical methods work side by side under one roof, advancing in parallel. It's a faster, smoother path from gene sequence to IND-ready with momentum built in from day one.

DNA TO IND

The 40 week roadmap.

Reduces Program Risk
Reduces Development Costs
Enhances Planning Predictability
Enables Earlier Clinical Supply-Readiness
Supports Your Competitive Advantage

1 Kick-Off Meeting

2 Identification of Final Clone

3 Successful Pilot Run

4 Completion of CGMP Batch

A laboratory environment built for development expertise.

Development scope

- Cell line development (CHO, HEK293)
- Upstream process development
- Downstream process development
- Analytical method development
- Formulation development

Scientific infrastructure

- High-throughput screening
- Bench-scale bioreactors
- Analytical instrumentation
- Stability chambers
- Characterization platforms

Integration with Tustin

- Unified quality system
- Shared project team
- Direct manufacturing handoff
- Single regulatory footprint
- One CDMO, two sites

WHY AVID BIOSERVICES

A development site designed around what comes next.

Scientific depth

Senior scientists embedded in every program. Direct access, no escalation layers.

Built for handoff

Every decision made with scale in mind. Development that's ready for manufacturing.

One team, two sites

The Costa Mesa and Tustin teams are integrated. No organizational walls between development and CGMP.

Twenty minutes apart

Costa Mesa and Tustin are a short drive apart. Site visits cover both campuses in a single afternoon.

US-based foundation

Domestic development, domestic manufacturing, domestic supply chain.

Let's get the foundation right.

Every Avid program begins with foundational decisions made in Costa Mesa. Whether you're moving toward IND or planning your CMC strategy, this is where the work begins. With you, from the start.
